

“Santa Maria del Giudice” Tectonic Unit
Marmi dei Monti Pisani (CCE)

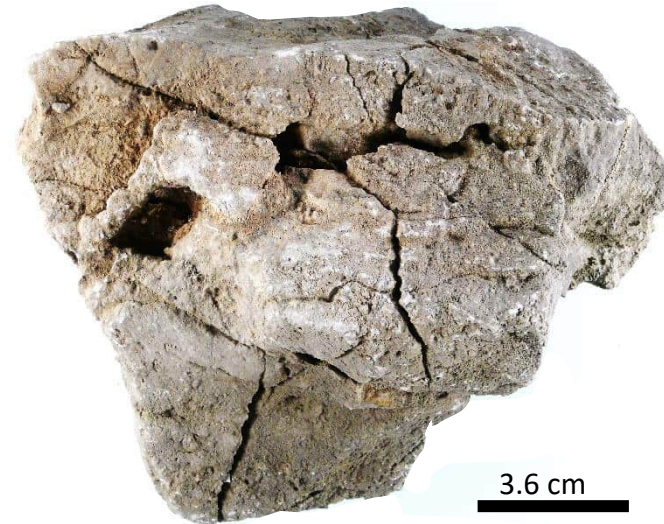

Marble outcrop along path 117 near the Monte Castellare
Visitor Center (La Valle locality).

Poorly stratified light grey marble with metre-thick strata.
Diffuse occurrence of dissolution structures and altered
fracture joints.

MP12C

43°45'45.11"N, 10°27'02.54"E

Grey marble with fractures and dissolution cavities. Rough
appearance due to the presence of rounded shape and
millimetre size calcite crystals (allochemical), in finer-grained
calcitic matrix.
